

COMMERCIAL & TECHNICAL ARCHITECTURE BLUEPRINT

REFLOW MASTER STRATEGY • CONFIDENTIAL

ReFlow

Comprehensive Competitor Intelligence, Plan Breakdowns, Cloud Hosting Feasibility, Operational Cost Modeling, and Commercial Pricing Architecture

PRODUCT ARCHITECTURE	TARGET SEGMENT	CLOUD BASELINE COST	GROSS PROFIT MARGIN
Hybrid Cloud + Chrome CDP	General-Purpose SMB RPA	\$37 – \$50 / month	95.6% Contribution

1. Executive Summary & The ReFlow Architectural Advantage

Modern automation software is broken into two extremes: **Cloud Headless Scrapers** (Axiom, Browse AI), which incur huge server bills (\$0.02–\$0.10/min) and suffer frequent IP bans and 2FA failures; and **Enterprise RPA Suites** (UiPath, Microsoft Power Automate), which cost hundreds of dollars per month and require certified consultants.

ReFlow operates on a **Hybrid Paradigm** that decouples the local execution engine from the cloud control plane:

Customer Workstation (ReFlow Runner) Zero Compute Cost	ReFlow Cloud Control Plane \$37–\$50/mo Fixed
Native Chrome (Port 9222): Real user profile, persistent cookies, genuine hardware canvas.	Next.js 16 Web Dashboard: Real-time workflow builder, run dispatcher, and audit views.
Node.js Daemon (packages/engine): Lightweight CDP connector, 10s poll loop, atomic run claims.	REST API v1: Authenticated polling queue, atomic state transitions, telemetry sync.
90s HITL 2FA Window: Halts replay, alerts user for SMS/Authenticator, resumes smoothly.	Supabase PostgreSQL: Workflows, organizations, runs, and artifact hash tracking.
Local Storage: Files stored directly in customer folders with SHA-256 deduplication.	Cloudflare R2: Optional zero-egress cloud artifact vault for paying subscribers.

ReFlow's Structural Margin Advantage:
Because Chromium, DOM parsing, JavaScript execution, and heavy file downloads occur 100% on customer hardware, your cloud server cost per run is sub-millicent (\$0.0001–\$0.0003). You achieve software gross margins exceeding 95% while bypassing bot detection naturally through real residential/office IPs.

2. Deep Competitor Intelligence & Monetization Breakdown

Below is an exhaustive forensic analysis of how the major competitors package, meter, and price their platforms:

Microsoft Power Automate (Desktop & Cloud)	Enterprise Desktop RPA
Plans: Free (Attended Windows only) • \$15/user/mo (Premium) • \$150/bot/mo (Process/Unattended) • \$215/bot/mo (Hosted VM)	
How They Charge: Capacity-based licensing. Free edition lacks cloud scheduling and triggers. Attended desktop flows require user presence (\$15/user/mo). Autonomous background execution requires the "Process" license at \$150/bot/month, plus user-managed Windows VM costs. Pay-as-you-go Azure meters charge \$0.60/cloud run and \$3.00/desktop run.	
Traps & Weaknesses: Running 3 unattended bots costs \$450/month in licenses alone. Premium connectors require all flow users to hold paid licenses. Free AI Builder credits removed in late 2026 (\$500/mo add-on).	
UiPath (Automation Cloud)	Global Enterprise Leader
Plans: Community (Non-commercial) • \$420/month (~\$5,040/yr Pro Starter) • \$15,000–\$50,000+/year (Enterprise)	
How They Charge: Per-Robot / Per-Developer annual seat commitments. Pro tier includes 1 Studio license, 1 attended robot, and 1,000 Automation Units. Unattended bots cost \$1,380 to \$8,000/year extra.	
Traps & Weaknesses: Prohibitive cost for SMBs; "Automation Units" burn rapidly on Document Understanding; requires specialized certified RPA developers to build and maintain.	

Axiom.ai (Browser Automation)

No-Code Extension & Cloud

Plans: Free Trial (2 hrs) • \$15/mo (Starter: 5 hrs) • \$50/mo (Pro: 20 hrs) • \$150/mo (60 hrs) • \$250/mo (100 hrs)

How They Charge: Metered strictly on runtime minutes/hours. If a slow portal or rate limit takes 3 minutes to load a page, 3 minutes are deducted from your balance. Concurrency is throttled (1 bot on Starter up to 20 on Ultimate).

Traps & Weaknesses: Zero minute rollover; users suffer runtime anxiety when web pages lag; Chrome extension frequently crashes on massive DOM tables; cloud runs trigger bot bans.

Browse AI (Web Extraction & Monitoring)

Cloud Headless Scraper

Plans: Free (50 credits) • \$48/mo (Personal: 2,000 credits) • \$87/mo (Pro: 5,000 credits) • \$500+/mo (Company)

How They Charge: Credit-based consumption. 1 credit = 1 basic page extraction or 10 extracted rows. Monitored robot slots are capped (5 on Personal, 10 on Pro).

Traps & Weaknesses: Severe 2x–10x credit penalty on "Premium Sites" (LinkedIn, Amazon, government portals); cloud IPs get blocked by Cloudflare; zero local desktop file handling.

Bardeen.ai (Work Intelligence)

AI GTM & Sales Agents

Plans: Free (100 credits) • \$10–\$15/mo (Pro: 500–1,000 credits) • \$50–\$150/mo (Business teams)

How They Charge: Monthly credit subscriptions. Web actions cost 1 credit; data enrichment costs 3 credits/row. Pivoted heavily to GTM sales workflows (HubSpot/LinkedIn).

Traps & Weaknesses: Enrichment burns credits rapidly; abandoned generic back-office portal automation; cannot handle repetitive invoice loop downloads.

Sema4.ai / Robocorp

Developer Python RPA

Plans: Developer (Free 240 min) • Consumption Tier (\$0.10 / run minute) • Enterprise Custom

How They Charge: Pure consumption per execution minute across Control Room environments. Supports 20 workspaces and 20 parallel executions.

Traps & Weaknesses: At \$0.10/min, a daily 30-min extraction costs \$90/mo; code-only barrier (Python/Robot Framework); zero visual no-code builder for office staff.

Comprehensive Competitor Comparison Matrix

DIMENSION	POWER AUTOMATE	UIPATH	AXIOM.AI	BROWSE AI	REFLOW (YOUR PRODUCT)
Pricing Metric	Per User / Bot	Per Robot License	Runtime Minutes	Task Credits / Rows	Runner Seats + Runs
Entry Cost	\$15 / \$150 / mo	\$420 / mo	\$15 / mo	\$48 / mo	\$29 / mo (Starter)
3 Unattended Bots	\$450 / mo	\$1,200+ / mo	\$150 / mo	N/A (Cloud only)	\$79 / mo (Professional)
Execution Engine	Windows VM	Windows Desktop/VM	Cloud / Extension	Cloud Headless	Local Real Chrome (CDP)
2FA / HITL Window	Complex setup	Attended prompt	None	Breaks completely	Built-in 90s HITL Banner
Anti-Bot Resistance	Moderate	Moderate	Poor (Cloud IPs)	Poor (Cloud IPs)	Unmatched (Residential IP)
Local Deduplication	Manual script	Manual script	None	None	Native SHA-256 Checksums

3. ReFlow Monetization Options: 7 Commercial Models

Model 1: The Hybrid "Runner Seats + Run Volume" Model (Recommended Flagship)

This model aligns pricing with physical machine utilization while giving generous monthly run quotas:

Starter \$29 / month \$24/mo billed annually ✓ 1 Desktop Runner connected ✓ 500 Runs / month ✓ 5 Active Workflows ✓ Local disk storage only ✓ Standard 10s polling interval ✓ Overages: \$10 / 500 extra runs	Professional \$79 / month \$65/mo billed annually ✓ 3 Desktop Runners connected ✓ 3,000 Runs / month ✓ Unlimited Workflows ✓ 10 GB Cloudflare R2 Backup ✓ Webhook & Slack 2FA alerts ✓ 5s priority polling interval ✓ Overages: \$8 / 1,000 extra runs	Business / Team \$199 / month \$165/mo billed annually ✓ 10 Desktop Runners connected ✓ 15,000 Runs / month ✓ Unlimited Workflows ✓ 50 GB Cloudflare R2 Backup ✓ Multi-user RBAC & Audit Logs ✓ Real-time push & priority support ✓ Overages: \$5 / 1,000 extra runs
---	---	---

Complete Portfolio of Alternate Commercial Models

MODEL STRATEGY	PRICING STRUCTURE	CORE ADVANTAGES	TARGET BEST-FIT PERSONA
Model 2: Per-Worker License	\$39 to \$49 / mo per PC Unlimited local runs. Optional \$15/mo for 25GB cloud vault.	Predictable IT budgets; undercuts Power Automate by 70%.	Mid-market IT & corporate procurement.
Model 3: Task Consumption	\$19/mo (1,000 runs) • \$49/mo (4,000 runs) • \$119/mo (15,000 runs)	Low entry price point; high self-serve conversion velocity.	Self-serve growth hackers and freelancers.
Model 4: Accounting Vertical	\$49/mo (10 portals) • \$129/mo (35 portals) • \$299/mo (100 portals)	Massive perceived value: directly saves 20+ billable hours/mo.	Accounting firms, bookkeepers, CFOs.
Model 5: Agency / MSP Reseller	\$249/mo base (15 client orgs, 15 runners, 25k pooled runs) + \$15/client add-on.	Rapid distribution: one agency partner brings 15–50 end users.	IT MSPs, bookkeeping agencies.
Model 6: Per-Step / Operations	\$19/mo (25k steps) • \$49/mo (100k steps) • \$129/mo (400k steps). Refill: \$10 / 25k.	Granular & fair (Make.com/Zapier model); captures true complexity of multi-page loops.	High-volume data loops, ERP batch extractors.
Model 7: Hourly Credits / Digital Bot	\$19/mo (15 hrs @ \$1.26/hr) • \$49/mo (50 hrs @ \$0.98/hr) • \$129/mo (160 hrs @ \$0.80/hr).	Unbeatable ROI hook: "Hire a digital worker for <\$1/hr vs \$25/hr human temp." Pauses clock during 2FA!	Operational business owners, finance teams.

4. Cloud Hosting & Infrastructure Comparison

INFRASTRUCTURE STACK	ARCHITECTURE COMPONENTS	MONTHLY COST	10S POLLING SUITABILITY
Option A: Managed PaaS (Recommended)	Render/Railway (Node.js) + Supabase Cloud Pro + Cloudflare R2	\$37 – \$50 / mo	High: Persistent Node instance handles HTTP keep-alive effortlessly.
Option B: Self-Hosted VPS	Hetzner Cloud CPX31 (Docker / Coolify) + Self-hosted Postgres + MinIO	\$16 – \$35 / mo	Unmatched: Native Linux kernel handles 5,000+ polling connections.
Option C: Serverless / Edge	Vercel Pro + Neon Serverless Postgres + Cloudflare R2	\$60 – \$150+ / mo	Poor: 21.6M monthly polling requests incur heavy serverless invocation penalties.
Option D: Hyperscaler	AWS ECS Fargate + RDS Aurora Postgres + AWS S3	\$180 – \$350+ / mo	High: Enterprise grade; high ops overhead.

5. Granular Operational Cost Modeling Across Scale Milestones

EXPENSE ITEM	UNDERLYING SERVICE / CALCULATION	PHASE 1: LAUNCH (50 ORGS, 100 W...	PHASE 2: GROWTH (250 ORGS, 750 W...	PHASE 3: SCALE (1,000 ORGS, 3,50...
Web & API Compute	Render / Railway persistent Node.js instances	\$15 / mo (1x 2GB RAM)	\$35 / mo (2x Instances)	\$100 / mo (Cluster of 4)
PostgreSQL Database	Supabase Pro (PgBouncer/Supervisor pooling)	\$25 / mo	\$50 / mo (+ Compute addon)	\$150 / mo (Team 4vCPU)
Object Storage	Cloudflare R2 (\$0.015 / GB stored)	\$1 / mo (~60 GB)	\$8 / mo (~500 GB)	\$45 / mo (~3,000 GB)
Data Egress	Cloudflare R2 (\$0.00 Egress fee)	\$0.00	\$0.00	\$0.00
DNS, CDN & DDoS	Cloudflare Pro / Free	\$0 / mo	\$20 / mo	\$20 / mo
Email & 2FA Notifications	Resend / Postmark + Twilio SMS	\$5 / mo	\$45 / mo	\$160 / mo
Error Monitoring	Sentry & BetterStack Telemetry	\$0 / mo (Developer tier)	\$26 / mo	\$65 / mo
Domain & CI/CD	Cloudflare Registrar + GitHub Actions	\$5 / mo	\$10 / mo	\$25 / mo
Stripe Processing	2.9% + \$0.30 per customer transaction	~\$115 / mo	~\$560 / mo	~\$2,200 / mo
Total Monthly Operating Cost	All Infrastructure & Gateway Fees	~\$166 / month	~\$754 / month	~\$2,765 / month

6. Technical Feasibility & Scalability Guardrails

6.1 Polling Math & Database Query Indexing

At a 12-second average polling interval, 1 worker produces 7,200 requests/day. At 1,000 customers (3,500 workers), the system handles ~291 requests/second. To prevent table scans and DB locks, run this migration in Supabase:

```
-- Optimized Partial B-Tree Index for High-Frequency Polling
CREATE INDEX IF NOT EXISTS idx_execution_runs_active_polling
ON wf_execution_runs (org_id, status)
WHERE status = 'pending';
```

This ensures polling executes as an index-only scan in < 0.8ms, keeping PostgreSQL CPU usage below 15% on modest compute.

6.2 Direct Pre-Signed Cloud Storage Pattern

To keep Next.js API server RAM consumption under 150MB, files must **never stream through the web server**:

```
1. Runner downloads PDF locally → computes SHA-256 checksum.
2. Runner requests presigned URL: POST /api/v1/artifacts/presigned-url
3. Next.js validates plan quota → issues Cloudflare R2 pre-signed PUT URL.
4. Runner uploads directly to Cloudflare R2 via HTTP PUT.
5. Runner registers artifact: POST /api/v1/artifacts
```

7. Unit Economics, Cash Flow & Financial Trajectory

Assuming the recommended **Model 1 (Hybrid \$29 / \$79 / \$199)** with a blended ARPU of **\$65 / month**:

MILESTONE METRIC	10 CUSTOMERS	50 CUSTOMERS	100 CUSTOME...	250 CUSTOMERS	500 CUSTOMERS	1,000 CUSTOM...
Monthly Revenue (MRR)	\$650	\$3,250	\$6,500	\$16,250	\$32,500	\$65,000
Annual Run-Rate (ARR)	\$7,800	\$39,000	\$78,000	\$195,000	\$390,000	\$780,000
Total Infra & Stripe Costs	\$75 / mo	\$166 / mo	\$280 / mo	\$754 / mo	\$1,420 / mo	\$2,765 / mo
Monthly Net Operating Profit	\$575 / mo	\$3,084 / mo	\$6,220 / mo	\$15,496 / mo	\$31,080 / mo	\$62,235 / mo
Net Operating Margin	88.5%	94.9%	95.7%	95.4%	95.6%	95.7%

Break-Even Milestone:

Baseline fixed infrastructure (Render \$15 + Supabase \$25 + Domain \$5) =

\$45.00 / month

. Just

2 paying customers

on the Starter plan (\$29/mo) make the business completely self-sustaining.
